

Multiplication coefficients used to determine the regulated Entry/Exit tariffs for the natural gas transmission service provided by "Vestmoldtransgaz" LLC for the year 2024

Multiplication coefficient according to point 9 of ANRE Decision no. 535/2019 represents the coefficient applied to the corresponding proportion of the reference price to calculate the reserve price for a non-annual standard capacity product.

The multiplication coefficients used by "Vestmoldtransgaz" LLC for the new-year standard capacity products and approved by ANRE through Decision no. 524 of September 3, 2024 are:

No.	Standard capacity product	Year	Multiplication coefficient
1.	Quarterly	2024	1
2.	Monthly	2024	1
3.	Daily	2024	1
4.	intraday	2024	1

According to ANRE Decision No. 524 of September 3, 2024 on the approval of the multiplication coefficients used by "Vestmoldtransgaz" LLC for quarterly, monthly, daily and/or intraday standard capacity products in the gas year 2025-2026, when establishing the level of the multiplication coefficients, ANRE took into account:

1. and long-term natural gas transmission capacities, in order to make efficient investments in the transmission system in correlation with achieving the level of income regulated by the Transmission System Operator;
2. The need to offer all available transmission capacities to as many system users as possible;
3. Increasing liquidity on the natural gas market in the Republic of Moldova;
4. Encouraging the entry of new suppliers into the natural gas market, interested in purchasing natural gas transmission services.

The multiplication coefficients approved by ANRE are to be used when calculating the tariffs for capacity reservation for firm short-term natural gas transmission services (quarterly, monthly, daily and/or intra-day).
